

3.7 CPE 1.126
51 ~~48~~⁴⁹. A recombinant host cell comprising the polynucleotide of claim ~~48~~⁴⁹, wherein said polynucleotide includes the portion of the deposited DNA which codes for the polypeptide having an amino acid sequence according to SEQ ID NO:2.

52 ~~49~~⁵⁰. A method for producing a polypeptide comprising expressing from the recombinant cell of claim ~~49~~⁵⁰ the polypeptide encoded by said polynucleotide.

53 ~~50~~⁵¹. A method for producing a polypeptide comprising expressing from the recombinant cell of claim ~~50~~⁵¹ the polypeptide encoded by said polynucleotide.

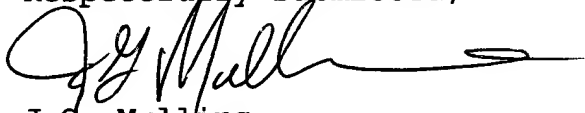

54 ~~51~~⁵². A method for producing a polypeptide comprising expressing from the recombinant cell of claim ~~51~~⁵² the polypeptide encoded by said polynucleotide.

Remarks

The above claims of the above amendment are presented to expedite the prosecution in this application. These claims are believed to be fully supported by the originally presented claims, specification or drawings. Therefore, no new matter is believed to be included. The specification has been amended to accomodate the updated Sequence Listing, filed herewith. No new matter is presented by such changes.

The Examiner is invited to call the undersigned at the below number if any further action by applicant would expedite the examination of this application.

Respectfully submitted,

J.G. Mullins
